EDA And Feature Engineering Of Google Play Store Dataset

In today's digital era, Google Play serves as a vast marketplace for mobile applications, boasting a plethora of apps spanning various categories and functionalities. This dataset provides a comprehensive snapshot of the Google Play Store ecosystem, offering insights into app performance, user ratings, pricing strategies, and market trends. With over 10,000 apps in the dataset, it allows for in-depth analysis and exploration of various factors influencing app success and user engagement on the platform.
